

ACCREDITATION CERTIFICATE

LB-153-CAL

Dubai Accreditation Department

has accredited

Abhath Weights & Measuring Laboratory
Shed No. 6, Industrial Area 2, Al Qusais
Dubai- United Arab Emirates

In accordance with the requirements of ISO/ IEC 17025: 2005 to undertake the tests
in the field of:

Calibration

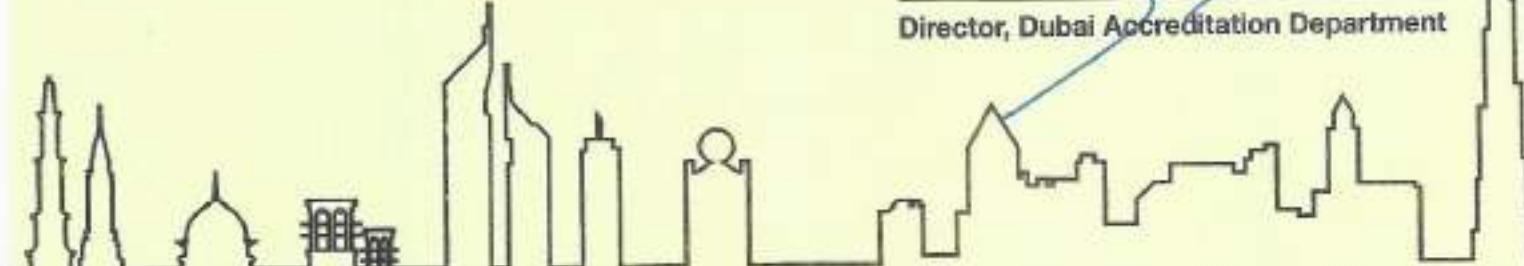

For the tasks listed in the attached Scope of Accreditation

This Accreditation is invalid without the attached scope of accreditation and shall remain in force within the validity period printed below, subject to continuing compliance with the requirements of the accreditation program.

Validity of Certificate: from 22- 09- 2016 to 21- 09- 2019

Initial Accreditation Date: 22- 09- 2013

Director, Dubai Accreditation Department

SCOPE OF ACCREDITATION

Temperature Calibration

Abhath Weights & Measuring Laboratory

Shed No. 6, Industrial Area 2, Al Qusais

Dubai- United Arab Emirates

Issue No: 02

Issue date: 03- 04- 2017

Accreditation Certificate No: LB-153-CAL

DETAILS OF THE APPLICABLE RANGE OF CALIBRATION AND MEASUREMENT CAPABILITY FOR THE SCOPE OF ACCREDITATION				
Calibration Field/ Measured Quantity	Calibration Method	Range and Specification	Calibration Measurement Capability (CMC)*	Location
Glass thermometer	Comparison Method by using Digital Temperature Indicator with Standard RTD	-10 °C to 100 °C	0.15 °C	Permanent Laboratory
Direct Reading Thermometer, (Thermocouples, resistance thermometers) with indicator	Comparison Method by using Standard RTD/Standard Thermocouple/Digital Temperature Indicator	-10 °C to 420 °C	0.26 °C	Permanent Laboratory /Customer premises
		420 °C to 600 °C	3.9 °C	
Temperature liquid bath	Comparison Method by using Standard RTD/Standard Thermocouple/Digital Temperature Indicator	-10 °C to 200 °C	0.88 °C	Permanent Laboratory /Customer premises
Dry block temperature Calibrator	Comparison Method by using Standard RTD/Standard Thermocouple/Digital Temperature Indicator	-10 °C to 420 °C	0.26 °C	Permanent Laboratory /Customer premises
		420 °C to 600 °C	4.7 °C	
Temperature Gauge and dial thermometers	Comparison Method by using Standard RTD/Standard Thermocouple/Digital Temperature Indicator	-10 °C to 420 °C	0.15 °C	Permanent Laboratory /Customer premises
		420 °C to 600 °C	4.9 °C	

Note: For history details of accredited conformance assessment activities, please refer to Dubai Accreditation Department, Dubai Municipality.

- * Calibration and Measurement Capability (CMC) is the smallest uncertainty of measurement that a laboratory can achieve within its scope of accreditation when performing more or less routine calibrations of nearly ideal measurement standards or nearly ideal measuring equipment. Calibration and Measurement Capabilities represent expanded uncertainties expressed at approximately the 95 % level of confidence, usually using a coverage factor of $k = 2$. The actual measurement uncertainty of a specific calibration performed by the laboratory may be greater than the CMC due to the behavior of the customer's device and to influences from the circumstances of the specific calibration.
